Sum calculator – Test Case

ID Test Case: TC001

Title: Sum test between 2 numbers

Objective: Verify if the calculator app will return the expected sum value between 2 numbers.

Previous conditions: Access the calculator app in the cellphone and make sure that you are using the most updated version of the app.

Test steps:

- Input the first number
- Press the “ + ” symbol
- Input the second number
- Check the result by clicking in the “ = ” signal

Input data

- **Number 1:** 10
- **Number 2:** 4

Expected result: 14

Observations:

Make sure to input the correct numbers (10 and 4) and execute the sum. After that, verify if the expected output works. If something wrong occurs or the value be different from 14, document the error and track the reason for that.
