Test case – Adding a product in a shopping cart

ID Test Case: T002

Title: Adding a product in a shopping cart

Objective: Verify if the software, after pressed the add button, adds a product in the shopping cart

Previous conditions: Access the company software, and log in. After that, go to the products section.

Test steps:

- Go to the company software
- Log in your account
- Go to the products section
- Select a product and press the button to add this product into the shopping cart

Input data:

- Select a product and click on the icon to add into the shopping cart.

Expected result:

- The product be added into the shopping cart

Observations:

- Make sure to access the latest version of the software and log in your account. After that, execute the test steps and verify if the expected output works. If something not expected occurs, document it and track the possible error for that.
